TUESDAY 17th Feb			
School morning session 1			
9:00-10:15	**Meso-scale organization of networks: theory and applications (1/2) – Eduardo Altman**		
School morning session 2			
10:45-12:00	**Meso-scale organization of networks: theory and applications (2/2) – Eduardo Altman**		
School afternoon session 1			
1:15-2:30	**Indigenous Data Sovereignty – Daniel Wilson**		
School afternoon session 2			
2:30-3:45	**Gentle Introduction to Deep Graph Learning for Network Scientists – Ingo Sholtes**		
School afternoon session 3			
4:15-5:30	**Ecological Networks: from data reconstruction to dynamical insights – Kate Wootton and Anshuman Swain**		
Social session 1			
5:30-late	**Welcome reception**		

WEDNESDAY 18th Feb					
Keynote 1					
9:00-10:00		**Tina Eliassi-Rad**			
Parallel 1		Stream 1	Stream 2	Stream 3	Stream 4
10:30 - 12:30	Start time	**Graph Neural Networks and Generative Graph Models**	**Network Control, Synchronization, and Interventions**	**Spreading Dynamics and Polarization**	**Higher-Order Networks and Hypergraphs (I)**
MORNING	10:30	Deep Graph Generation for Microcanonical Graph Ensemble. Hoyun Choi, Deok-Sun Lee	Multiscale Organization of the Human Connectome via Laplacian Renormalization. Gabriele Poidomani, Pablo Villegas, Tommaso Gili	Political Information Dissemination by Domestic Political Actors in Pakistan. Hassan Mustafa	Loops, not groups: Long loops are responsible for discontinuous phase transitions in higher-order network contagions. Leah A. Keating, Laurent Hébert-Dufresne
	10:45	Efficient "Neural" Community Detection in Attributed Graphs with a Temporal Modularity Loss Function. Nelson Aloysio Reis de Almeida Passos	Distinct Synchronization Profile of the Gate Node in a Modular Power Grid. Jonghoon Kim, Cook Hyun Kim, Heetae Kim	How Social Ties Mobilize and Polarize: Social Network Determinants of Election Outcomes. Yuliia Kazmina	Discovering Higher-Order Interactions in Hypergraphs via Projections: Concepts & Algorithms. Elise Tate, Joshua Grochow
	11:00	Multiscale Network Renormalization. Diego Garlaschelli	Selecting controlled edges in edge-based pinning control synchronization. Siyang Jiang	Social network heterogeneity promotes depolarization of multidimensional opinions. Jaume Ojer, Michele Starnini, romualdo pastor satorras	SIRS processes competing on simplicial complexes. Haiying Wang, Lina Zhao, Huijie Yang, Changgui Gu, Jack Murdoch Moore
	11:15	Characterizing the dynamics of unlabelled temporal network trajectories. Annalisa Caligiuri, Tobias Galla, Lucas Lacasa	Hierarchical structure of redundancy and synergy in brain networks across goal-directed learning. Leonardo Di Gaetano, Alain Barrat, Andrea Brovelli	Social compensation strategies in response to individual loss in natural populations. Eloise F. Newman, Adelaide Daisy Abraham, Josh A Firth	Symbolic Higher-Order Analysis of Multivariate Time Series. Andrea Civilini, Fabrizio de Vico Fallani, Vito Latora
	11:30	Graph Theory Signatures of Seizure Susceptibility in scn1lab-/- Zebrafish Network. Wei Qin, Ethan Scott	Oscillatory adaptive networks in cognition-like processes: from slime moulds to brain organoids. Linnea Gyllingberg	Quantifying Influence of Network Structure on Opinion Dynamics. Yu Xing	

		Stream 1	Stream 2	Stream 3	Stream 4
	11:45	Enhancing Graph Neural Networks with Random Graph Ensembles. Jan von Pichowski, Vincenzo Perri, Ingo Scholtes		Explaining the Game: Network Science in Soccer. Javier M. Buldú	
	12:00	Using Temporal Graph Isomorphism to Understand the Expressivity of Temporal Graph Neural Networks. Franziska Heeg, Jonas Sauer, Petra Mutzel, Ingo Scholtes			
	12:15	Quantum Preferential Attachment. Istvan A. Kovacs			
Keynote 2					
2:45-3:45		**Lewis Mitchell**			
Parallel 2		Stream 1	Stream 2	Stream 3	Stream 4
14:15 - 15:45	Start time	**Mobility, Accessibility, and Urban Networks**	**Culture, Knowledge, and Online Information**	**Community Structure and Detection**	**Higher-Order Networks and Hypergraphs (II)**
AFTERNOON	14:15	Impact of network structures on emergency services - Examples from Germany. Melanie Reuter-Oppermann	Cultural Evolution of Human Beauty Standards. Louis Boucherie, Karolina Sliwa, August Lohse, Sagar Kumar, Katharina Ledebur	Beyond NMI: Reliable Community Detection Evaluation Using Kappa Index and F-Score. Xin Liu, Huimin Cheng, Zhong-Yuan Zhang	Disentangling the role of heterogeneity and hyperedge overlap in explosive contagion on higher-order networks. Federico Malizia, Andr√©s Guzman, Iacopo Iacopini, Istv√°n Z. Kiss
	14:30	Women mobility networks enable more efficient travel. Silvia De Sojo, Sune Lehmann, Laura Maria Alessandretti	How Collective Memory Gets Forgotten: The Origins of Relaxation Speed in Social Video Sharing Platform. Kiminori Ito	Individual Fairness in Community Detection: Metrics and Insights. Fabrizio Corriera, Frank W. Takes, Akrati Saxena	Global Supply Chain Resilience and Geopolitical Uncertainty. Xinyi Zhao, Prasanna Gai, Chanelle Duley
	14:45	ATGreen(GO): A multi-dimensional framework to measure accessibility and promote exposure to urban green.	The dichotomy of knowledge: Evolutionary dynamics with game transitions on social networks. Amit Basak, Supratim Sengupta, Maria Kleshnina	Local epidemic thresholds on networks: community-specific risk from mobility-driven interactions. Eugenio Valdano, boxuan wang	Weak higher-order interactions enhance synchronization: a study on the Kuramoto model - Contributed Talk.

		Rossano Schifanella, Alice Battiston			Riccardo Muolo, Hiroya Nakao, Marco Coraggio
	15:00	Mixture models uncover polycentric urban structure from mobility networks. Andrew Renninger	Who Gets the Blame? A Structural Theory of Scapegoating in Social Networks. Qinyang Yu	Bipartite Patent Networks Reveal Hidden Diversity in Innovation: Communities, Market Structure, and Fitness‚ÄìComplexity. FEI WANG	Pairwise approximations of simplicial contagion models on hypergraphs. Eugene Tan
	15:15	Exploring Pedestrian Permeability in Urban Sidewalk Networks. Albert Sole-Ribalta, Javier Borge-Holthoefer, Robert Benassai-Dalmau	Mapping emergent knowledge in Wikipedia through complex networks. Gustavo A. Schwartz	Synchronisation Detection Using Spatial Ordinal Partitions in Networks. Zahra Shahriari, David M. Walker, Shannon D. Algar, Michael Small	Multi-Order Hypergraph Stochastic Block Model. Kazuki Nakajima, Yuya Sasaki, Takeaki Uno, Masaki Aida
	15:30			Meso-scale Structures in Signed Networks. Wei Zhang, Olga Boichak, Tristram Alexander, Tiago P. Peixoto, Eduardo Altmann	
Short talks plenary 1					
4:15-5:30		**Spotlight talks**			
Social session 2					
5:30-7:30		**Poster session and reception**			

THURSDAY 19th Feb					
Keynote 3					
9:00-10:00		**Rio Sun**			
Thematic sessions 1		Stream 1	Stream 2	Stream 3	Stream 4
10:30 - 12:00	Start time	**Discrete network models in biology**	**Networks in Science of Science**	**The Scales of Movement (1/2)**	
MORNING		TBA	TBA	TBA	
Thematic sessions 2		Stream 1	Stream 2	Stream 3	Stream 4
1:15-2:45	Start time	**Algorithmic Fairness in Network Science**		**The scales of Movement (2/2)**	
AFTERNOON		TBA		TBA	
Keynote 4					
2:45-3:45		**Yukie Sano**			
Short talks plenary 2					
4:15-5:30		**Lightning Talks**			
Social session 3					
7:00-late		**Conference dinner at the Hilton**			

FRIDAY 20th Feb					
Keynote 5					
10:00-11:00		**Clare Postlethwaite**			
Parallel 3		Stream 1	Stream 2	Stream 3	Stream 4
11:00 - 12:00	Start time	**Multilayer Social Networks: Perception, Fairness, and Influence**	**Optimal Transport, Embeddings, and Network Inference**	**Health and Biological Networks**	**Collaboration and Influence**
MORNING	11:00	DQ4FairIM: Fairness-aware Influence Maximization using Deep Reinforcement Learning. Akrati Saxena, E Harshith Kumar Yadav, Shashi Shekhar Jha	Cost and preferences in bipartite complex systems: inverting the (sub-)optimal transport problem. Dario Mazzilli	Cell Interrupted - Modeling Epithelial to Mesenchymal Transition vs. Mitochondrial Dysfunction-Associated Senescence Tug of War. Erzsebet Ravasz Regan	Network Dynamics of Scientific Fields: Centralization and Stability in Conceptual and Citation Structures. Csaba Kiss, Dr. Roland Molontay
	11:15	Fairness-Aware PageRank Approximation. Mukesh Kumar, Gaurav Dixit, Akrati Saxena	Hyperbolic Embedding of Multilayer Networks. Mario Chavez	Nested Networks in Health: Linking Microbiomes and Interspecies Contact to Address Cross-Scale Complexity. David T S Hayman	Spatial-Temporal Information Processing Pathways and Mechanisms Identified in AI Citation Networks Tsung-Wen Yen, Siew Ann Cheong, YiFei Li, Kelin Xia
	11:30	Applicability of the Minimal Dominating Set for Influence Maximisation in Multilayer Networks. Micha≈Ç Czuba, Mingshan Jia, Katarzyna Musial-Gabrys, Piotr Br√≥dka	Estimation, Experimental Design, and Optimal Policy when Facing Partial Network Data from a Single Network. Tyler McCormick	Robust Basins, Fragile Attractors: A New View on Biological Network Dynamics. Claus Kadelka, Venkata Sai Narayana Bavisetty, Matthew Wheeler	Using Temporal Collaboration Networks to Understand Activity Cascades in OSS Communities. Lisi Qarkaxhija, Ingo Scholtes
	11:45	Unmasking Covert Control in Global Corporate Governance. Takayuki Mizuno, Shuhei Kurizaki		Association between oral microbiota and close-range proximity of children in primary school. Lorenzo Dall'Amico, Xiangning Bai, Sandra Marie Weltzien, Simon Rayner, Daniela Paolotti, Isabelle Sylvie Budin Ljsne, Andreas Matussek, Anne-Sofie Furberg, Ciro Cattuto, Christopher Sivert Nielsen	A Multiplex Lens on Influencer Performance, Group Synergy, and Network Centralization Keywords: Multiplex Networks, Team Performance, Group Synergy, Motivation, Influence. Megan Alexis Chan, Shraeya Iyer, Isabel Su, Jeffrey Tu, Noshir Contractor

Parallel 4		Stream 1	Stream 2	Stream 3	Stream 4
14:15 - 15:45	Start time	**Finance, Trade, and Systemic Risk Networks**	**Network Theory and Measures**	**Dynamics on Networks Across Domains**	
AFTERNOON	14:15	Filtering amplitude dependence of correlation dynamics in the cryptocurrency market. Marcin Wątorek, Jarosław Kwapień, Stanisław Drożdż	Learning by Surprise: Surplexity for Mitigating Model Collapse in Generative AI. Daniele Gambetta, Gizem Gezici, Fosca Giannotti, Dino Pedreschi, Alistair Knott, Luca Pappalardo	Extending Earthquake Network Models with a Magnitude-Based Time-Window Approach. Jennifer Ribeiro Silv√©rio da Concei√ß√£o, Douglas Santos Rodrigues Ferreira	
	14:30	Temporal Motif Structures in Japanese Corporate Shareholding Networks. Shinichiro Tanabe, Takaaki Ohnishi	Similarity and complementarity in generalized random geometric graphs. Szymon Talaga, Brennan Klein	Balancing Stability and Complexity in Boolean Models of Biological Networks. Venkata Sai Narayana Bavisetty, Matthew Wheeler, Claus Kadelka, Reinhard Laubenbacher	
	14:45	Complementary network models to assess social-ecological fit: A case of flood planning in the Wolastoq. Bridget McGlynn, Angela Guerrero Gonzalez, Julia Baird, √ñrjan Bodin, Ryan Plummer	Extension of shortest path based Betweenness centrality to the multicriteria case. Andrea Raith, Clara Sim√≥n De Blas, Daniel Gomez	A network analysis of collective motions in a three-species Vicsek model. Seung-Woo Son	
	15:00	Information Processing Pathways in the Stock Markets. Kang Zheng Tien, Peter Yen Tsung-Wen, Siew Ann Cheong, Tiziana Di Matteo, Kelin Xia	The ultrametric backbone is the union of all minimum spanning forests. Luis M Rocha, Jordan C. Rozum	Structural dynamics of plant-pollinator mutualistic networks. Albert Sole-Ribalta, Aniello Lampo, Javier Borge-Holthoefer, Mar√≠a J. Palazzi	
	15:15	US and EU Aid and Trade, and the Relationships with Human and Environmental Crises. Rosie Hayward, Peter Klimek, Asjad Naqvi	First return processes of non-backtracking random walks on random networks. Ofer Biham, Dor Lev-Ari, Ido Tishby, Eytan Katzav, Diego Krapf	Influence of networked partisans on perceptions of media bias. Yutong Bu, Andrew Melatos	
	15:30	Network Security under Heterogeneous Cyber-Risk Profiles and Contagion. Elisa Botteghi, Martino			

	Centonze, Davide Pastorello, Daniele Tantari		

Lightning talks order

Order	Title and authors
1	Tie Strength characterization in Dutch Cocaine Trafficking Networks. Frederike Oetker, Rick Quax
2	Biclique in Global Bank Shareholder Networks. Oscar M. Granados
3	Evolution and determinants of firm-level systemic risk in local production networks. Giulio Cimini, Riccardo Di Clemente, Anna Mancini, Balv°zs Lengyel
4	Discerning media bias within a network of political allies and opponents: the idealized example of a biased coin. Nicholas Kah Yean Low, Andrew Melatos
5	Interactive Web Interface for Korea's Statute Network Using Community-Aware Layout. Maryam Shakeri, Juyong Park
6	Higher-order correlations reveal complex memory in temporal hypergraphs. Luca Gallo, Lucas Lacasa, Vito Latora, Federico Battiston
7	Work Engagement through Collective Emotions of Japanese Workers. KANTARO KAWAI, Koutarou Tamura, Yukie Sano
8	Dependency Networks of Emotional Facial-Expression in Mood and Anxiety Disorders. Yael Jacob, Giada Dirupo, James Murrough, Laurel Morris
9	Network-Theoretic Mapping of Breast Cancer in India through Functional Cartography in Gene Regulatory and Protein-Protein Interactions Yanjusha Madhu, Dr. Jasleen Gund, Dr. Priyanka Jain
10	myAURA: a personalized health library for epilepsy management via knowledge graph sparsification and visualization. Luis M Rocha
11	Structure matters: bipartite contact networks and vaccination. Zoe Kumbaroff, Emily Harvey, Dion O'Neale, Jesse Whitehead
12	Disentangling individual-level from location-based income uncovers socio-economic preferential mobility and impacts segregation estimates. Andrew Renninger
13	Collaborative Networks in Tourism Disaster Management: A Case Study of Rural, Nature-based Destinations in New Zealand. Lucia Danzi, Caroline Orchiston, James Higham, Rodolfo Baggio
14	The network Liouville equation and the quest to understand complex networks on a general dynamical trajectory. Andrea Filippo Beretta

15	Individual Navigation Strategies in the Knowledge Space. Manran Zhu, Janos Kertesz
16	Analysing community-level spending behaviour contributing to high carbon emissions using stochastic block models. Ognyan Simeonov, Valerio Restocchi, Benjamin Goddard
17	Latent Preferences: Friendship and Peer Tutor Networks. Fatimah Abdul Razak
18	The Ethics of Networks: Fairness, Power, and Responsibility in Venture Capital. Marta Zava

Accepted posters

Title and authors
Toward a First-Principles Theory of Resilience for Complex Quantum Networks   Vignesh Raman, Riccardo Bassoli, Frank H.P. Fitzek
Reinforcement Learning For Respondent-Driven Sampling   Justin David Naggar Weltz, Angel Yoon, Yichi Zhang, Alexander Volfovsky, Eric Laber
PrEParados Model: Developing and Implementing a Community-Engaged Social Network Approach to HIV Prevention   Edda Rodriguez, Lacey Despres, Ana Bravo, Ariana L. Johnson, Lilliana Vilchez, John Skvoretz, Mariano Kanamori
Sexual Partnership Contexts among Latino Men in Miami, Florida: A Multilevel Latent Class Analysis of Egocentric Network Data   Lacey Despres, Edda Rodriguez, Ariana L. Johnson, Ana Bravo, Lilliana Vilchez, Susanne Doblecki-Lewis, Stephen Fallon, Mariano Kanamori
Entropy-based node centralities in networks: Targeted attacks on Watts‚ÄìStrogatz and power grid systems   Davide Fallara
Citation Distance Matters: Towards a New Metric for Evaluating Journal Impact   Roland Molontay, Kate Barnes, Levente T√∂r√∂k
ROADS - A Unified Network-Based Framework for Road System Indicators   Nita Andreea
Stratification of Cancer Patients Using Visit Trajectory Analysis   Simon D. Lindner
Quantifying Rhythmic Creativity in Classical Music   Halla Kim, Juyong Park
From Local Hubs to Global Effects: A Multilayer Network Approach to Earthquake Dynamics   Jennifer Ribeiro Silv√©rio da Concei√ß√£o, Douglas Santos Rodrigues Ferreira
Testing Most Influential Sets   Nikolas Kuschnig, Lucas Darius Konrad

A Novel Ant Colony Optimization Approach for Core‚ÄìPeriphery Detection in Networks Imran Ansari, Dr. Qazi J Azhad, Dr. Niteesh Sahni	
Polarization and Opinion Shifts in HPV Vaccine Discourse on Twitter(X) Mami Iida, Ai Hori, Yukie Sano	
Inferring the Contact Network Structure of Infectious Diseases: Applications of Likelihood-Free Inference for Epidemiological Agent-Based Modelling James Bristow, David T S Hayman, Matthieu Vignes	
Shopping Abroad: Cross-Border Venture Capitalism in Artificial Intelligence Marta Zava	
Dynamics and Diversity of a Cross-feeding Microbial Ecosystem Takashi Shimada, Kunihiko Kaneko	
Spectral fluctuations and crossovers in multilayer network Himanshu Shekhar, Ashotosh Dheer, Santosh Kumar(deceased), N. Sukumar	
Vehicular Mobility Networks in a Regional City: A Preliminary Case Study Takahiko Sakuma, Yingshuai Wang, Takashi Miyata, Yukie Sano	
The trickle down from environmental innovation to productive complexity Francesco de Cunzo, Alberto Petri, Andrea Zaccaria, Angelica Sbardella	
Predict Sales Demand from People Flow Data and Point of Interest Data using Spatio‚ÄëTemporal Graph Convolutional Network Divya Bala, Yudai Ueno, Rinko Shinzato, Keisuke Chujo, Toshiki Murata, Yoshiya Shigeeda, Kosti Koistinen, Chandreyee Roy, Fumiko Ogushi, Takashi Shimada, Kimmo Kaski	
Reliability assessment of Australia‚Äôs Internet infrastructure using a multilayer network model Benjamin Lang, Matthew Roughan, Hung Nguyen	
Extracting Area Characteristics from People Flow and POI Data Using Graph Neural Networks Yudai Ueno, Divya Bala, Rinko Shinzato, Keisuke Chujo, Toshiki Murata, Yoshiya Shigeeda, Koistinen Kosti, Roy Chandreyee, Fumiko Ogushi, Takashi Shimada, Kimmo Kaski	
Personlalized PageRank centrality from a Fixed Point Theory perspective Miguel Romance	
Toward a Multi-Dimensional Valuation of Personal Data in the Digital Economy Junaid Haseeb, Vimal Kumar, Mubashir Qasim, Sara Rawlence	
Direct Quantification for Stability from Linear Dynamical Systems on Networks Jieru Liao	
Optimal sensor placement for data assimilation applied to dynamics on networks Lauren Smith	
Inferring missing edges from Cartesian products of graphs Adam H. Hamilton, Hung Nguyen, Matthew Roughan	
Spatial Analysis of Starbucks and BEP Stores in Seoul Examined by Subway Network SeGi Yu	

Critical threshold for synchronizability of high-dimensional Kuramoto oscillators under higher-order interactions Dohyun Kim	
Thermal Conductance Graph (TCG): A Novel Physics-Inspired Method for Time Series to Complex Network Mapping Subhayan Nag, K. Satheesh Kumar, Manoj Kumar T. K.	
Countering counterfeiters: The Mittheilungen des Museen-Verbandes and forgery networks in the 20th century Demival Vasques Filho, Jaap Geraerts, Henry Keazor, Rebecca Welkens, Thorsten W√°bbena	
Unveiling the importance of nonshortest paths in quantum networks Xinqi Hu, Gaogao Dong, Kim Christensen, Hanlin Sun, Jingfang Fan, Zihao Tian, Jianxi Gao, Shlomo Havlin, Renaud Lambiotte, Xiangyi Meng	
Comparison of link prediction methods on synthetic and real networks Alexey Vlaskin, Eduardo Altmann	
Mechanisms and emergent properties of social structure: the duality of actors and social circles Demival Vasques Filho	
Networks meet mating systems ‚Äì a new approach to studying animal behaviour Zita Roithmair, Dion O'Neale, Eileen Hebets, Matja≈æ Kuntner, Christina Painting	
Efficient quantification of canalization in automata networks Luis M Rocha, Jordan C. Rozum, Herbert Sizek	
Interdisciplinary Training in Complex Networks and Systems Luis M Rocha, Deborah S. Rocha	
Task-Focused Dynamic Network Inference from Node Attribute Time Series Namrata Banerji, Tanya Berger-Wolf	
Measuring Cascade Networks on X: The Hyogo Gubernatorial Election Genta Toya, Bruno T. Sugano, Shuhei Saigusa, Yasuhiro Hashimoto, Masashi Toyoda, Naoki Yoshinaga, Kazutoshi Sasahara	
Behavioural responses to the loss of key social relationships in a wild bird system Adelaide Daisy Abraham, Ben Sheldon, Josh Firth	
A Forecast Model for COVID-19 Spread Trends Using Blog and GPS Data from Smartphones Kenta Yamada, Ryosuke Susuta, Hideki Takayasu, Misako Takayasu	
Transitions to synchronization in adaptive multilayer networks with higher-order interactions Richita Ghosh, Md Sayeed Anwar, Dibakar Ghosh, Juergen Kurths, Manish Dev Shrimali	
Impact of innovation on opinion diversity in voter models Byungjoon Min	
Control Spread via Multilayer Network Manipulation Micha≈Ç Czuba, ≈Åukasz Krai≈Ñski, Mateusz Stolarski, Bogumi≈Ç Kami≈Ñski, Pawel Pralat, Katarzyna Musial-Gabrys, Piotr Br√≥dka	
Graph Reduction in Multirelational Networks: A Spreading-Oriented Benchmark Mateusz Stolarski, Micha≈Ç Czuba, Piotr Bielak, Piotr Br√≥dka	

Comparing Network Similarity Metrics for Structural Change Detection in Evolving Mineral Trade Networks Yashar Perhat
Probing Persistent Structures in Stock Markets and Citation Networks at Multiple Length Scales Siew Ann Cheong, Kang Zheng Tien, Peter Tsung-Wen Yen, Kelin Xia
Multilayer Artificial Benchmark for Community Detection (mABCD) ≈Åukasz Krai≈Ñski, Micha≈Ç Czuba, Piotr Br√≥dka, Pawel Pralat, Bogumi≈Ç Kami≈Ñski, Fran√ßois Th√©berge
Disparate effects of resonances in delay-based reservoir computers for chaotic attractor reconstruction Kathy L√∞dge, Lina Jaurigue
Network spreading from network dimension Jack Murdoch Moore, Michael Small, Gang Yan, Huijie Yang, Changgui Gu, Haiying Wang
Predicting higher-order spreading dynamics with unknown topology Cong Li, Zili Zhou, Piet Mieghem, Bo Qu, Xiang Li
Modeling Opinion Dynamics and Social Network Algorithms Henrique Ferraz de Arruda, Kleber A. Oliveira, Yamir Moreno
Using the power of community detection in marine networks Ane Pastor Rollan, Eric L. Berlow, Rich Williams, Eric A. Treml
Analysis of Dynamic Trade Network Under Attacks Reetendra Singh, Shivshanker Singh Patel
A route to higher-order Kuramoto models through phase reduction theory - Lightning Talk Riccardo Muolo, Iv√°n Le√≥n, Shigefumi Hata, Hiroya Nakao
On modularity-based fair community detection Georgios Panayiotou
